We have clearly explained the evident mean ing of that passage in the Opposition platform which depracates the action of the Federal Government through any of its departments to interfere with the institution of clavery. The resolution in question, so far as applicable to slavery in the Territorise, was intended simply to condamn the policy of interfering to establish or prohibit the lastitution. Certainly it was not designed, certainly it could not be designed to mean that the judicial department of the government might not adjudicate upon the onl-ject of slave property in the Tarritories or anywhere else, or that the legislative department might not creat the legislation processor for the might not grant the legislation necessary for the maintenance of the righte adjudicated by the judiciary, or that the Executive Department might not execute the laws as passed. Any euch construction as this of
